

Don't allow TV and newspapers in the same city to be owned by one company. If too few companies own too many media in a city, the people will not get a good view of the truth. Their news will be biased and the people cannot make informed choices. Please keep media ownership diverse, so that democratic decisions can be made with as much knoweldge as possible. No matter how much money we make, we will be sad if there is not a free press that expresses many points of view.
